

Table Summarisation - Final Questionnaires (Part 2)

We need a last effort to understand how a person can understand a table and how they represent the collected information in their minds.

For this reason, we ask you to complete a brief questionnaire in which we will gather both personal information and task-related answers. Your personal information will be used to conduct a statistical analysis on the answers we have collected.

The following questionnaire will present you with three tables and questions regarding their content

☐ High (C2) - I completely understand what I read or listen to

☐ Medium-High (C1-B2) - I easily understand almost everything that I read or listen to in English

☐ Medium (B1) - I am an independent user, even though some complicated linguistic structures are still hard for me to understand

☐ Medium-Low (A2) - I can understand some sentences, but I still consider myself a basic user

☐ Low (A1) - I have just approached English language

Table
comprehension

In this section we will investigate the way tables are understood. A table will be presented and you will have all the time that you'll need to read it; you will be asked about the content of each table in the following pages.

For statistical purposes, we will ask you to provide indications about the starting and ending time of this section.

Table
1

Have a look at table for all the time that you'll need to fully understand it. Don't focus only on its structure or on the way it is sorted, but try and grasp its content as well.

You will be then presented with sentences about which to express how much on a 7-degree Likert scale you think it was represented in the table.

We are not, by any means, assessing your understanding skills, but we are trying to comprehend what in a table attracts the user's attention when they first approach it.

Table
3

Have a look at table for all the time that you'll need to fully understand it. Don't focus only on its structure or on the way it is sorted, but try and grasp its content as well.

You will be then presented with sentences about which to express how much on a 7-degree Likert scale you think it was represented in the table.

We are not, by any means, assessing your understanding skills, but we are trying to comprehend what in a table attracts the user's attention when they first approach it.

Table 3 - Domain knowledge

We ask you to give us information about how familiar you are with the main topic of Table 1

56. How would you rate your background knowledge on the main topic of Table 3? *

If you know nothing at all about the subject of Table 3, your background knowledge will be rather poor; on the contrary, if you are a domain expert, it will be very extensive.

Contrassegna solo un ovale.

	1	2	3	4	5	6	7	
Very poor	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Very extensive

57. How would you rate your interest in the main topic of Table 3? *

Rate your interest in the domain of Table 3 regardless of your background knowledge and the information you have gathered from this experiment.

Contrassegna solo un ovale.
